

We claim:

5 of: 1. A method of filling solid pharmaceutical product packaging comprising the steps
selectively dispensing one or more solid pharmaceutical products from a plurality of
different drug sources into each cavity of a plurality of product package template cavities; and
transferring the solid pharmaceuticals located in the product package template cavities
into corresponding cavities of a product package member.

10 2. The method of claim 1, further comprising a step of, during said step of selectively
dispensing the solid pharmaceutical products, simultaneously sealing another pharmaceutical
product package that has been previously filled with a variety of solid pharmaceuticals.

15 3. The method of claim 1, further comprising a step of printing information on a
pharmaceutical product package.

20 4. The method of claim 2, further comprising a step of printing information on a
pharmaceutical product package.

25 5. The method of claim 1, further comprising a step of at least substantially
simultaneously dispensing first and second pharmaceuticals from first and second canisters into a
single template cavity.

6. The method of claim 2, further comprising a step of at least substantially
simultaneously dispensing first and second pharmaceuticals from first and second canisters into a
single template cavity.
